The Hartford's Feedlot Cattle Insurance program lets you add more protection:

Valuation Schedule: Our standard program values covered livestock at current market value. But our optional valuation schedule can provide more flexibility. It amends coverage with values for types or categories of covered livestock that you and The Hartford agree aren't represented by current market value.

Hypothermia: Adds hypothermia to our standard program as a covered cause of loss. Two conditions apply:

- Hypothermia is caused by exposure to freezing rain, sleet, blizzard, or snowstorm
- Hypothermia results in the death of your covered livestock

Carcass Removal: Adds coverage for the expense of carcass removal to our standard program if such carcasses are covered livestock that died as a result of a covered cause of loss.

Contaminated Feed or Water: Helps protect your investment when the consumption of a toxic substance in feed or water results in the death of covered livestock.

Ease And Efficiency: A Single Point of Contact

Our in-house claims service consultants are available 24/7 to manage your claims and coverage assessments. Feel confident knowing that we understand your business needs and any loss settlements will be expedited smoothly.
