

Our advanced Risk Engineering Laboratory is ready when you are.

Unseen doesn't mean harmless. We help you detect and manage air and noise hazards before they impact your team.

Workers in many industries may unknowingly face exposure to hazardous substances like dust, vapors and biological contaminants, which can lead to serious health risks. Occupational health is vital for a safe, productive workplace and a key part of any industrial hygiene plan.

As one of only three U.S. insurance labs accredited by the AIHA-LAP, LLC,¹ our Risk Engineering Laboratory helps customers reduce these occupational health exposures to air and noise hazards. We have been supporting customers since 1968 with comprehensive analysis services, equipment rental, and risk mitigation consultations, available to insureds as part of business insurance policies and to non-insureds at [affordable rates](#).

Laboratory services

With our state-of-the-art laboratory, our Certified Industrial Hygienists deliver high-quality analysis with industry-leading response times. Choosing The Hartford for your analytical lab needs streamlines your process by eliminating multiple lab contracts and gives you access to expedited testing services when time is critical.

Our comprehensive services, available on-site and virtually, include:

- Sampling strategy support and data interpretation
- A virtual industrial hygiene consultation
- Use of air sampling pumps
- Use of noise dosimeters and sound level meters
- Sampling media
- Ventilation assessments

See our [lab service rates](#) to learn more about our affordable pricing and multi-sample discounts.

Equipment rental

Our lab is designed to support field technicians and safety personnel – yours or ours. Our extensive inventory of industrial hygiene monitoring equipment is available to rent, including direct reading air monitors, noise evaluation, heat stress and indoor air quality.

When you rent our equipment, we provide self-sampling support through real-time demos or virtual instruction. You'll also receive a comprehensive interpretation and explanation of your monitoring results via written report or additional consultation.

Consulting services

Our in-person and virtual consultations can help you interpret lab results and mitigate the identified risks with practical solutions, ultimately reducing risks to your workers. We partner with you to develop a long-term strategy to anticipate, identify, evaluate and control occupational health hazards ranging from toxic chemicals and dusts to high noise and radiation.

With on-site services, our Certified Industrial Hygienists and trained consultants provide recommendations that can eliminate and control hazards by:

- Substituting or removing chemicals
- Implementing engineering solutions, such as acoustics or ventilation
- Coordinating administrative controls
- Leveraging personal protective equipment

Most initial consultations can be completed in 60 minutes and include:

- Professional review of a specific production operation in your facility
- Focused discussion of specific workplace chemicals and physical hazards
- Guidance on new processes, changes in chemicals and employee concerns
- Customized solutions to reduce or eliminate potential exposures
