

THIS ENDORSEMENT CHANGES THE POLICY. PLEASE READ IT CAREFULLY.

MULTINATIONAL CHOICE - CONTROLLED MASTER PROGRAM LIMITS

This Endorsement modifies insurance under the following:

MULTINATIONAL CHOICE - COMMERCIAL GENERAL LIABILITY COVERAGE PART
MULTINATIONAL CHOICE – EMPLOYERS RESPONSIBILITY COVERAGE PART
MULTINATIONAL CHOICE – EMPLOYEE BENEFITS LIABILITY COVERAGE PART
MULTINATIONAL CHOICE – PROPERTY COVERAGE PART

- A.** The following definition applies to this endorsement:

"Program Local Policies" means "local insurance" put into effect in connection with this policy and reinsured by us.

- B.** The provisions of the above coverage parts that address limits of insurance are revised to include the following provisions:

Controlled Master Program (CMP) Limits

1. CMP Program Limits.

You agree that this policy is part of a program that coordinates this policy with all "Program Local Policies". You agree that any amounts paid under a "Program Local Policy" are considered as paid by us under this policy, and are included within the limits as set forth in the coverage parts listed above. Any damages, loss, expense or other amounts incurred or paid under a "Program Local Policy" shall reduce by the same amount the applicable limit of this policy.

2. CMP Limit Exhausted.

Whenever a limit of insurance in this policy for any applicable coverage part is exhausted, whether by payment directly hereunder or under a "Program Local Policy", you agree not to seek, directly or indirectly, through any other entity or otherwise, any further amount under this policy or under a "Program Local Policy", and you agree to reimburse us within thirty (30) days of our request any amounts paid or incurred under any such policies that in total exceed the applicable limit of this policy, whether or not the payment of such sum was within your control. If you make a claim for a loss under a single "Program Local Policy" with a higher limit than exists under this policy, you shall not be prevented from making a claim under that policy for up to that higher limit.
