

Connect with our global network and GO.

The power of GO.

We collect, evaluate and implement user feedback to continuously improve and enhance our **Global Online** portal, ensuring it is always an efficient, collaborative and transparent trading platform for users, by users.

Delivering real-time efficiency for businesses of all sizes.

Successful multinational programs require close collaboration among the customer, broker and carrier at both the program and local country level. In order to efficiently transact compliant, local coverage solutions, we've developed **The Hartford Global Insurer Network** and **The Hartford Global Online (GO) trading platform**.

The Hartford Global Insurer Network is a directly managed network of insurers that allows us to provide localized coverage solutions in more than 220 countries and territories around the world, for virtually all coverage products. Pricing, terms and conditions are established centrally with local policies implemented by an expert team of network coordinators. Claims are centrally managed by our dedicated international claims handling unit to help local operations get back to business quickly after a loss and ensure consistent claims experiences around the world.

Our award-winning Global Online (GO) Portal allows for fast and efficient trading of information among involved parties in real time and provides our clients with access to the data they need to make informed decisions regarding coverage and claims.

GO facilitates transparent, cloud-based collaboration among The Hartford and its insurer partners, clients and brokers, sharing:

- Instruction issuance
- Claims information
- Rates of exchanges
- Account information
- Policy limits
- Key Performance Indicators and more
