

With our risk engineering experience, it's smooth sailing ahead.

Marine insurance is a global enterprise.

84% of global trade is carried by sea.

Our Services

Whether you're shipping products across the country or across the world, we can provide innovative technical solutions and support for the wide variety of marine risks you may face.

Our Risk Engineering organization includes marine professionals, technical specialists, engineering consultants and certified industrial hygienists. They understand the safety and risk management needs of the maritime industry and have the experience needed to create the right solution for you.

Our Team

Our consultants have extensive experience in all phases of marine insurance.

- Worldwide cargo
- Project cargo
- Marine general liabilities
- Hull and transportation security

Our Capabilities

We can provide both on- and off-site evaluations and recommendations for the full range of marine insurance risks, including surveys for the following:

- Cargo risk movement assessments and warranties
- Project cargo
- Cargo storage suitability
- Packaging suitability and assessments
- Heavy lift movement
- Hull and machinery (under 1,500 tons) including small passenger vessels
- Trip-in-tow with safe routing recommendations and monitoring
- Marine risks for the entertainment industry

Our Capabilities (continued)

We can also provide services for:

- Marine terminal operators
- Marine contractors
- Boatyards
- Shipyards
- New ship construction
- Vessel fleet safety reviews (both desk-to and on-vessel for compliance)
- Supply chain/logistics reviews

Focus on Innovation

Technology changes daily. Our Risk Engineering team closely collaborates with our Innovation Group to offer vast technical marine knowledge and real-time data from select Internet-of-Things (IoT) devices. We can partner with you to assess your needs, evaluate device capabilities and design a customized program to help ensure the safety and success of your project.
